

Erratum to “Convergence of Sewing Conformal Blocks”

Bin Gui

September 2024

In Thm 6.3, one should add the extra assumption that \mathfrak{X} admits local coordinates η_\bullet . This condition ensures that $\mathscr{W}_\mathfrak{X}(\mathbb{W}_\bullet) \simeq \mathbb{W}_\bullet \otimes \mathcal{O}_\mathcal{B}$, and hence each stalk of $\mathscr{W}_\mathfrak{X}(\mathbb{W}_\bullet)$ is generated by the global sections of $\mathscr{W}_\mathfrak{X}(\mathbb{W}_\bullet)$.
